Distribution Category UC-98

Weekly Coal Production

Energy Information Administration
Washington, D C

Contains Supplementary Data

Production for Week Ended:
January 25, 1986

Preface

The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by state, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its

data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1984*, and *Coal Data: A Reference*.

This publication was prepared under the direction of Robert Harris, Chief, Data Systems Branch, by Judith Wood. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/252-8800).*

Highlights

U.S. coal production in the week ended January 25, 1986, as estimated by the Energy Information Administration, totaled 18.75 million short tons (bituminous coal and lignite, 18.68 million short tons; Pennsylvania anthracite, .08 million short tons). This was 5.5 percent higher than the previous week, and was 39.6 percent higher than production in the corresponding week of 1985, when production was affected by snow and severe cold weather.

Cumulative U.S. coal production from January 1 through January 25, 1986 was estimated at 59.46 million tons, 4.9 percent above the 56.66 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).

Technical Note
Census Export and Import Data

Export and import data are obtained from the Bureau of the Census, U.S. Department of Commerce, where they are compiled monthly from documents filed with the U.S. Customs Service, as required by law.

Each coal shipment is reported in short tons with corresponding total dollar values. For export shipments, the f.a.s. export value is given; for import shipments, the Customs import value, c.i.f. import value, and f.a.s. import value are given. EIA converts all value data obtained from the Census Bureau to average price data by dividing the f.a.s. value by the quantity.

Some coal data obtained from the Census Bureau have been found to be misleading or incorrect, particularly where small quantities of coal are involved. The Energy Information Administration is initiating efforts to identify and correct these data. In the interim, certain data cells have been suppressed for publication purposes only: 1) average prices of \$200.00 per short ton or more; and 2) percent changes of 1,000 percent or more. Any future changes in methodology of computation or presentation of data will be documented at that time.

For reporting purposes, the month of exportation reflects the month in which the shipment leaves the United States; the month of importation generally is based on the month in which the U.S. Customs Service releases the merchandise to the importer. For both sets of data, however, there can exist a small carry-over from the actual month of exportation or importation to a subsequent month, usually the succeeding month. A number of factors in processing account for this, e.g., late receipt of a document for an end-of-month shipment, or rejection of a shipment by the computer due to failure to meet established edit criteria. These limitations should be considered when making comparisons.
